A PRESENT FOR BROTHER DUTTON

Admirers of His Work in Illinois
Announce Their
Intentions

There is a present coming to Brother Dutton, for so long the head of the Baldwin Home for Boys at the leper settlement on Molokai. He is going to get a copy of "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy.

The letter announcing the intention to send the book, if permission were granted, came in a letter to President

BROTHER JOSEPH DUTTON.

Pinkham yesterday, of which the following is the principal part:

An article in the magazine called "Human Life," for October, 1907, has just brought vividly to mind the noble work being done to ameliorate the conditions of the leper colony under your supervision.

To merely admire a character so noble as that of Brother Joseph Dutton and have no wish to help in his grand work, would seem pusillanimous; therefore it has been determined to ask permission to send to this grand man the greatest help we know of for

him and all mankind to get practical results from prayer to God and understanding of the Bible of vital moment to all.

We are aware of much misunderstanding concerning our textbook, "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, but we trust that no prejudice will prevent you from allowing us to send this book (now almost everywhere in the public libraries doing its good work) to Brother Dutton, which we will certainly do if we are given your kindly permission.

We feel assured that so good a man will sense its spiritual uplift and we trust by this means he may be spared from the sad fate of that good priest, Father Damien. Also we hope that many others of these afflicted people will be greatly benefited physically and every other way by the spiritual atmosphere shed abroad by this wonderful book, God's gracious gift to this age.

Besides the textbook to be used with the Bible we have other literature by the same author and periodicals issued by our publishing society in Boston

BROTHER JOSEPH DUTTON.

that are reliable and valuable as helps to suffering humanity. These will also gladly be sent with your permission to be used at your discretion. Humanity's betterment is our sole purpose in asking this favor.

SALMON OF TAHITI WILL MARRY ANYWAY

Pala Salmon, of Tahiti, a prince of the royal blood, has found his affinity. Not the dark hued Lillookalani, one time sovereign of the kanakas, but a San Francisco girl is the one upon whom the South sea potentate will bestow his hand and fortune. The prince refused to divulge the name of his bride elect, but admits that the marriage will take place before the end of this month. Gossip has it that she is a niece of a prominent retired army officer living in this city.

"The marriage will take place before I leave," said Prince Salmon yesterday. "You may count upon that, even if I have to kidnap the girl. I'm going to take no chances on her getting away from me. There's always another fellow, you know."

But the prince's appearance belied any misgivings indicated by his words. "She'll have me; she'll have me," he cried, and his 320 pounds shook with unrestrained joy. "I've offered her my heart and my hand and even my gouty feet, and she has accepted them all."

The coming marriage has excited a deal of interest and much speculation is rife as to the identity of the fiancée. The names of nearly all the eligibles in San Francisco society have been mentioned in this connection, but as yet nothing certain has been learned. On the arrival of the prince in this city some six weeks ago it was believed that he was on his way to Honolulu, there to become the husband of Queen Lillookalani. Consequently great surprise was felt when the announcement of his proposed marriage to a San Franciscan was made. Waving his hand toward the direction of the Sandwich Islands, the prince exclaimed: "No, no; my heart is not there. It is here among your charming San Francisco girls."

"Yes, prince, but where? There are lots of them here."

"Ah, that's the secret," he smilingly replied.—S. F. Call.

A late number of The Sketch, London, has a portrait of the former Queen of Hawaii under which is the "news" that she had married the Tahitian prince. It says she is a sister of Kamehameha III and acted as regent during his trip around the world.

NOTICE.

The Ladies' Aid Society of the First M. E. church will hold a rummage sale on Tuesday, November 5. Any one having articles of clothing, etc., for which they have no further use, will confer a favor on the society if they will leave same at M. E. parsonage or ring up parsonage, and things will be called for.

DR. WILLIAMS' PINK PILLS FOR ANAEMIA

The Blood, Dizzy Spells, Palpitating Heart and Smothering Sensations Indicate a Condition for Which This Remedy Is a Specific.

An anaemic condition, that is, a state of health in which the blood is apparently turning to water, and every organ of the body is suffering for lack of nourishment, can be met only by a remedy that will increase the quantity and richness of the blood.

Dr. Williams' Pink Pills actually make new blood and they have been curing anaemia for a generation. A recent case is that of Miss Nellie M. Danforth, of 66 South Broadway, Akron, Ohio. It was not an unusually severe case but was a characteristic one.

The approach of Miss Danforth's trouble was very gradual. She felt symptoms of it for a year and although she was under a physician's care for some time the treatment did not afford her any relief. She says:

"I had weak spells when I felt as though I was going to faint and my heart would palpitate so that I was almost smothered. I had no color, even in my lips, and my ears were as white as wax. Everyone said my blood was turning to water."

"Whenever I would rise from a chair I would have to hold on to it to steady myself as everything would turn dark before my eyes and all I could see were flashes of light like shooting stars."

"Nothing seemed to help me and when a friend recommended Dr. Williams' Pink Pills I got a box. I began to feel a little better and continued taking the pills until I had fully recovered. I have recommended Dr. Williams' Pink Pills to a number of my friends."

A valuable booklet, "Diseases of the Blood," containing fuller information will be sent free upon request.

Dr. Williams' Pink Pills are sold by all druggists, or sent, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.

WIZARD EDISON TO BE MAGIC HOUSE BUILDER

NEW YORK, Oct. 18.—The laboring man who makes \$1.50 a day can have an indestructible three story cement dwelling built in 12 hours at a cost of only \$1000.

All the truck horses of Manhattan will disappear from the streets forever, beginning in December.

Marconi will send 1000 words of wireless telegraphy a minute across the Atlantic within a few years.

These statements were made today by Thomas A. Edison in his laboratory at Orange, N. J., in the presence of a delegation of 300 members of the American electro-chemical society, which is holding its twelfth general meeting in this city.

Edison took a reporter to the second floor of his laboratory, showed him the model of a Queen Anne cottage, and said: "Next spring I intend to build a house by this model. By means of a system of patent molds it is possible for any contractor to build a house of solid cement 25 feet wide and 45 feet deep, three stories high and capable of comfortably housing three families for \$1000."

"The most important feature of the patent lies in the molds, which are of iron, but the material for the house is to be composed almost wholly of a new composition of mine, consisting of one part of cement, three parts of sand and five parts of quarter inch crushed stone."

Edison was asked how he was progressing with his storage battery for driving trucks.

"I don't mind telling you that I have at last succeeded in getting the storage battery to a condition in which it is of economic value," replied Edison. "Next December I expect to begin supplying a storage battery for trucks and then it will be cheap enough for even a butcher to purchase it. In December, when we will begin to deliver these batteries, the horse of Manhattan will disappear forever."

Edison was shown a wireless message and his comment was: "Give Marconi ten years and he will be sending 1000 words a minute by wireless. He won't need any duplex system to do it, either."

Extracts from Miss Evergreen's diary: "This is my eighth birthday. A new brother came. His name will be Fritz."

"Fritz is twenty years old today, just a year younger than I. People always take us for twins."

"Fritz will be thirty years old tomorrow, his wedding day. How the time does fly! Of course, he is eight years my senior, and used to carry me about when I was a baby; still, it seems strange to think of the boy getting married."—Fleegende Blaetter.
